BRIEF HISTORY

The ISO Recommendation R 971, *Common names for pesticides – Thirteenth list*, was drawn up by Technical Committee ISO/TC 81, *Common names for pesticides*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question led in 1966 to the adoption of a Draft ISO Recommendation.

In July 1967, this Draft ISO Recommendation (No. 1313) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Greece	Sweden
Belgium	India	Switzerland
Canada	Iran	Thailand
Colombia	Israel	Turkey
Czechoslovakia	Italy	U.A.R.
Denmark	Poland	United Kingdom
France	Portugal	U.S.A.
Germany	South Africa, Rep. of	Yugoslavia

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in February 1969, to accept it as an ISO RECOMMENDATION.

COMMON NAMES FOR PESTICIDES

THIRTEENTH LIST*

FOREWORD

This Draft ISO Recommendation gives the thirteenth list of common names approved by Technical Committee ISO/TC 81, *Common names for pesticides*, for certain pesticides of international importance. The chemical name in conformity with the rules of the International Union of Pure and Applied Chemistry (IUPAC) is given in each case, the one preferred by Chemical Abstracts being given first where appropriate; other chemical names commonly used are often included as well. Chemical structures are given together with notes concerning some of the names. The use of each compound is given in a separate column according to the following classification :

Acaricides	—	A	Molluscicides	—	M
Bactericides	—	B	Nematicides	—	N
Fungicides	—	F	Plant growth regulators	—	P
Herbicides	—	H	Rodenticides	—	R
Insecticides	—	I	Avicides	—	V

It is proposed in due course to issue further ISO Recommendations for approved common names. In some cases, widely used names are not available for international use at the present time, because they are protected by trade marks in certain countries.

* The previously issued lists constitute the subject-matter of the following ISO Recommendations :

- ISO/R 116, *Common names for pesticides* — First list
- ISO/R 219, *Common names for pesticides* — Second list
- ISO/R 258, *Common names for pesticides* — Third list
- ISO/R 290, *Common names for pesticides* — Fourth list
- ISO/R 411, *Common names for pesticides* — Fifth list
- ISO/R 566, *Common names for pesticides* — Sixth list
- ISO/R 628, *Common names for pesticides* — Seventh list
- ISO/R 785, *Common names for pesticides* — Eighth list
- ISO/R 967, *Common names for pesticides* — Ninth list
- ISO/R 968, *Common names for pesticides* — Tenth list
- ISO/R 969, *Common names for pesticides* — Eleventh list
- ISO/R 970, *Common names for pesticides* — Twelfth list

APPROVED COMMON NAMES

Common names English French (F) Russian (R)	Chemical name	Structure	Use (1)	Countries where name not acceptable
allidochlor alidochlore (F) аллидохлор (R)	<i>N,N</i> -diallyl-2-chloroacetamide <i>NN</i> -diallylchloroacetamide	$\begin{array}{c} \text{CH}_2 = \text{CH} \cdot \text{CH}_2 \\ \quad \quad \quad \diagdown \\ \quad \quad \quad \text{N} \cdot \text{C} \cdot \text{CH}_2 \text{Cl} \\ \quad \quad \quad \parallel \\ \quad \quad \quad \text{O} \end{array}$	H	Austria (2)
chlorphonium chlorfonium (F) хлорфонниум (R)	tributyl(2,4-dichlorobenzyl)- phosphonium tributyl-2,4-dichlorobenzyl- phosphonium (3)		P	
cypromid cypromide (F) ципромид (R)	3', 4'-dichlorocyclopropane- carboxanilide <i>N</i> -(3,4-dichlorophenyl) cyclo- propanecarboxamide 3', 4'-dichlorocyclopropane- carboxyanilide		H	Republic of South Africa
etinofen étinofène (F) этинофэн (R)	α -ethoxy-4,6-dinitro- <i>o</i> -cresol 2-ethoxymethyl-4,6- dinitrophenol		H	
fensulfothion fensulfothion (F) фенсульфотион (R)	<i>O,O</i> -diethyl <i>O</i> -[<i>p</i> -(methyl- sulfinyl) phenyl]- phosphorothioate diethyl 4-(methylsulphonyl) phenyl phosphorothionate <i>OO</i> -diethyl <i>O</i> -[4-methyl- sulphonyl) phenyl] phosphorothioate		N	U.S.A.
flurenol flurénoл (F) флуренол (R)	9-hydroxyfluorene-9- carboxylic acid		H	Republic of South Africa (4) United Kingdom (4) U.S.A. (4)

(1) Use : H – Herbicides. N – Nematicides. P – Plant growth regulators.

(2) The name "allidochlor" is not acceptable for use in Austria, as it is in conflict with the registered trade marks "Allocor", "Adocor" and "Aristocor".

(3) It should be stated which anion is present, e.g. chlorphonium chloride.

(4) The name "flurenol" is not acceptable for use in the Republic of South Africa, in the United Kingdom and in the U.S.A., owing to possible confusion with the chemical name "fluorenoл". "Flurecol" has been accepted as the common name.
